## Definitions of Terms

Term	What is it?	What does it tell you?
Average Capital Growth	It is the aggregate capital growth amount over a time frame longer than one year, expressed as an annual percentage.	Average capital growth figures allow you to monitor the performance of different areas or properties over a period of time. Be aware that the average capital growth figures are not the total growth figures divided by time. This method would overstate annual growth as it would include capitalisation.
Capital Growth	The capital growth is the growth in house prices over a period of time, expressed in percentage.	Capital growth figures allow you to monitor the performance of different areas or properties over a period of time.
Median Value	Residex holds a current value for every property in its database. The median value for any region is the middle value when all values are arranged in order. Where median is ascribed to a date range, the value represents the median at the end date.	The median value tells you what a typical property is worth in an area. By knowing the cost of a typical property in the area, you can judge which areas you can afford to invest in.
Rental Yield	The rental yield is the amount of rent you can expect to receive in a year, expressed as a percentage of a property's value. (The rental yield is an annual figure.) Rental yield is the annual rent figure divided by the property value figure.	Rental yield figures allow you to compare rental income from areas or properties with different property values.
Total Return	A combination of both capital growth and rental income.	Total return figures allow you to compare the investment returns of different areas or properties.
Data Validity	C = Confirmed	C means this sale record has been received from government.
	U = Unconfirmed	U means we have received this sale from the government however the address for which it has been registered does not match any address we have in our system at the time of the last update from Australia Post.
	UA = Unconfirmed Agent	UA means this sale information has been collected from a real estate agent however Residex has not received a government record to confirm its validity.
	UR = Unconfirmed Record	UR means this sale information has been collected from another source however Residex has not as of yet received a government record to confirm its validity.
Indexed Sale Price	This is calculated by adding the capital growth indexation to the previous sale price.	This gives you a current day estimate for the most recent sale for a property.

## Other Reports to Help with Your Decision Making

Residex provides a wide range of reports to assist in identifying the right price for a property and the areas which are most likely to provide quality rent and capital growth returns.

Report	Description	
	<p><b>The Residex Report</b> can help you make more profitable real estate purchase and sale decisions by understanding key market drivers.</p> <p>This Report contains detailed market commentary on factors affecting house and unit pricing including historical capital value, and rental price growth on every suburb in the state. Predictions are included on a regional basis.</p>	
<p>“...the average performing unit from a region in the Report out-performed the Australian average unit return by over 36%”</p>		
	<p>The <b>Best Rent Report</b> is ideal for investors looking to reduce out-of-pocket costs without compromising on capital growth. Each Report contains the best 100 predicted suburbs based on rental returns, capital growth predictions over five years and qualitative research.</p>
